

AutoCount Server 2.1

AutoCount Server is required to run AutoCount Accounting 2.1 and register Product ID for Licensing purpose. This document is a release note for AutoCount Server changes.

Revision 1:

ID	Description
13679	Enhance to add firewall exception to Public Profile by default
13893	Improve loading speed when “Get Available Database” when register database

**For changes before AutoCount Server 2.1, please refer to release note for AutoCount Server 2.0.*
